

Skills

- **Languages:** Java, Python
- **Frontend:** HTML, CSS, Tailwind CSS, React
- **Tools/Platforms:** Vercel, Git/GitHub, Figma, VS Code
- **Soft Skills:** Problem-solving, Team Leadership, Communication, Stakeholder Management

Professional Experience

- **VRC Grands – Co-founder** Jun 2024 - Present
Event & Artist Management Company
 - Co-founded and contributed to business development, client acquisition, and overall operations of an early-stage Private Limited venture.
 - Led end-to-end planning and execution of concerts, college fests, and corporate events, managing artist relations, bookings, negotiations, and on-ground coordination.
 - Supervised budgeting, logistics, and cross-functional teams to ensure successful project delivery and long-term client relationships.
- **Coding Blocks LPU:** Sept 2023 - Present
Student Body
 - Actively contributed as a core member of Coding Blocks LPU, assisting in the organization of technical events, workshops, hackathons, and coding competitions.
 - Coordinated with faculty mentors and student teams to manage event planning, registrations, promotions, logistics, and smooth on-ground execution.
 - Collaborated with cross-functional teams while strengthening leadership, teamwork, and communication skills through consistent organizational responsibilities.

Projects

- **Path finding | GitHub** Jan 2026
Tech Stack: Java, Spring boot, React.js, chart.js
 - Implemented multiple pathfinding algorithms including A*, Dijkstra, and Adaptive A* using Strategy & Factory design pattern.
 - Integrated Reinforcement Learning (Q-Learning) to dynamically optimize heuristic weights for improved performance.
 - Built an interactive React-based visualization with real-time grid simulation and performance analytics dashboard.
 - Designed scalable REST APIs using Spring Boot and deployed using Docker for full-stack integration.
- **Campus Complaint Management System with AI Priority Detection | GitHub** Aug 2025
Tech Stack: HTML, CSS, JavaScript, Python (Flask), MySQL, NLP
 - Developed a secure full-stack web application enabling anonymous complaint submission while securely storing student identities in the backend for administrative accountability.
 - Implemented NLP-based AI for automatic priority detection and department-wise classification to improve complaint resolution efficiency.
 - Designed an admin dashboard with a tracking ID system, status management, analytics insights, and toxicity detection to ensure transparency and responsible usage.

Certificates

- **Java with OOPs - Programming Language Cypher Schools** Jan 2026
Link: <https://www.cipherschools.com/certificate/kritika>
- **Computational Theory: Language Principle & Finite Automata Theory** Aug 2025
Link: <file:///C:/Users/Kritika%20Pradhan/OneDrive/Desktop/cert1.pdf>
- **ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM – Infosys Springboard** July 2025
Link: <file:///C:/Users/Kritika%20Pradhan/OneDrive/Desktop/cert3.pdf>

Achievements

- Co-founded and scaled an early-stage venture, leading operations and strategic execution across large-scale projects.
- Engineered AI-driven full-stack applications with secure backend architecture and intelligent automation.
- Demonstrated strong leadership and stakeholder management through cross-functional team collaboration and timely delivery.

Education

- **Bachelor of Technology (B. Tech) – Computer Science & Engineering** 2023-Present
Lovely Professional University (LPU), Punjab
- **Satyam International School (Class 12th – CBSE)** Completed – 2023
Satyam International School, Patna, Bihar
- **St Joseph’s Convent High School (Class 10th – ICSE)** Completed – 2021
St Joseph’s Convent High School, Patna, Bihar
